Reviews

Thorough guide for pdf enthusiasts. Better then never, though i am quite late in start reading this one. Its been printed in an remarkably simple way which is only soon after i finished reading through this pdf by which really altered me, change the way i believe.
(Dr. Rowena Wiegand)

HEAT ENERGY AND FUELS

Japtner Press. Hardcover. Book Condition: New. Hardcover. 324 pages. Dimensions: 8.5in. x 5.5in. x 0.9in. HEAT ENERGY AND FUELS- PYROMETRY, COMBUSTION, ANALYSIS OF FUELS AND MANUFACTURE OF CHARCOAL, COKE AND FUEL GASES by HANNS W. JUPTNER. Originally published in 1908. TRANSLATORS PREFACE: PROFESSOR HANNS JUPTNER has divided the study of chemical engineering into two groups, namely : energy and matter ; and beginning with a general discussion of the various forms of energy, has written four volumes covering the subject both theoretically and practically. The present volume deals with heat energy and fuels, and contains a large amount of carefully tabulated data in convenient form for use. A great deal of this data is new and will be welcomed by chemists, metallurgists and engineers. Although the book is intended for use in universities and engineering schools it is of equal value to practising engineers, since it gives not only the fundamental principles, but also the latest experimental data and practice. Among the topics of greatest practical interest are : Measure ment of high temperatures and late data on the melting points of various substances; discussion of incomplete combustion, combustion temperatures and combustion at constant volume and constant pressure, and an immense amount of data on solid, liquid and gaseous fuels and their production. The chapters on the gasification of fuels, which contain the results of the authors own experiments as well as those of Strache and Jahoda, are of especial value. The book has been extremely well received in Europe, where it is widely used both in schools and in practice as a text-book and handbook. THE TRANSLATOR. YORK, November, 1908. Contents include: CHAPTER I. GENERAL REMARKS. II. FORMS OF ENERGY INTRODUCTION. PAGE 1 11 VOLUME I. HEAT ENERGY AND FUELS. Part I. Heat Measurement, Combustion and Fuels. I. THE MEASUREMENT...
