Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Anatomy of the Brain and Spinal Cord: With Special Reference to Mechanism and Function, for Students and Practitioners The recent advances in human anatomy and its allied sciences necessitate the thorough revision this work has received. To place it fairly abreast of the times every section has been largely rewritten in accordance with the discoveries of the past few years. Being designed for a textbook, the subject-matter is presented in the order found convenient to the dissector. The description proceeds from the gross structures to the constituent neurones in each successive region. Wherever the embryology will assist the student to comprehend the adult forms, the development is briefly given. The embryology is more fully interwoven with the regular text than in the fourth edition; and, because of this, the special embryologic chapter is omitted. All other chapters are elaborated and illustrated by a number of new histologic and diagrammatic drawings; they are, therefore, somewhat enlarged, but the author has kept them within reasonable bounds. Some excellent illustrations also have been introduced from the fifth edition of Morriss Anatomy. The special objects held in view throughout the book are the location of functional centers and the tracing of their afferent, associative and efferent connections. Particular emphasis is laid upon the origin, course, termination and function of conduction paths as they are met in the regular study, and the more important and better known of these paths are summed up in a final chapter on the tracing of impulses. Function is everywhere correlated with structure; and so far as present knowledge permits, the function of each group of neurones is given in connection with its anatomical description....
