It is amazing how rapidly children develop in the first years of their lives. The acquisition of their mother tongue is especially fascinating because it is such a complex process. Not only the linguistic code has to be fully acquired but also all its rules and norms. That is, apart from the language's phonology, morphology, syntax, lexis and semantics, constituting the code of every language pragmatic rules are also important for the daily use and the full dominance of a language. This essay focuses on the most basic field, phonology, and explains how a child acquires the target language's phonology. Although the stages of the acquisition process are described generally since they are universal and hold true for all children independently of their mother tongue, the attention is on the English phonology in particular. First...
