## An Introduction to Using GIS in Marine Biology: Supplementary Workbook Five: Creating Maps For Reports And Publications

---

By Colin D. Macleod

Pictish Beast Publications, United Kingdom, 2013. Paperback. Book Condition: New. 214 x 149 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This book is the fifth companion volume to An Introduction To Using GIS In Marine Biology . It is designed to augment the information on using GIS in marine biology provided in that book, and, indeed, to be used alongside it rather than to be used independently as a stand-alone volume. Therefore, this book will be of most interest to those who have already read An Introduction To Using GIS In Marine Biology . This book consists of five exercises covering the practical use of GIS in marine biology using ESRI s ArcGIS(r) 10.2 software. These exercises are based around creating maps for reports and presentations. They range from making a map template which allows you to quickly make new maps in a standard format to creating a custom legend which allows you to repeatedly apply the same symbols to multiple data layers and making multi-part maps . The exercises are designed to be followed in the order they are presented, and work with a specific data set, which can be download separately for free. Working...
