

# Signaling at the Cell Surface in the Circulatory and Ventilatory Systems (Hardback)

By Marc Thiriet

Springer-Verlag New York Inc., United States, 2011. Hardback. Book Condition: New. 2012. 234 x 157 mm. Language: English . Brand New Book. The volumes in this authoritative series present a multidisciplinary approach to modeling and simulation of flows in the cardiovascular and ventilatory systems, especially multiscale modeling and coupled simulations. The cardiovascular and respiratory systems are tightly coupled, as their primary function is to supply oxygen to and remove carbon dioxide from the body's cells. Because physiological conduits have deformable and reactive walls, macroscopic flow behavior and prediction must be coupled to nano- and microscopic events in a corrector scheme of regulated mechanisms when the vessel lumen caliber varies markedly. Therefore, investigation of flows of blood and air in physiological conduits requires an understanding of the biology, chemistry, and physics of these systems together with the mathematical tools to describe their functioning. Volume 3 is devoted to the set of mediators of the cell surface, especially ion and molecular carriers and catalytic receptors that, once liganded and activated, initiate signal transduction pathways. Intracellular cascades of chemical reactions trigger the release of substances stored in cellular organelles and/or gene transcription and protein synthesis. Primary mediators are included in models of...

## Reviews

*This publication is very gripping and interesting. We have gone through and so I am confident that I am going to plan to read through yet again in the foreseeable future. You are going to like how the blogger wrote this ebook.*

-- Dr. Thaddeus Turner PhD

*Very useful to all of class of people. It is really simplified but unexpected situations within the 50 % in the ebook. I am delighted to let you know that this is actually the best book I have read in my personal daily life and can be the finest ebook for at any time.*

-- Gwen Schultz
